Commissioner for Patents

Art Unit: 3664

DETAILED ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 1-9 are pending.

Claim Rejections - 35 USC § 101

2. Claim 6, is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A computer program product should be recorded on some computer-readable medium.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-9, are rejected under 35 U.S.C. 102(b) as being anticipated by Inoue et al. (US 2003/0023348 A1).

As per claims 1, and 8, Inoue et al. disclose an electronic device, comprising a processing unit capable of: determining a first part of a new animation of an object on the basis of at least one position of the object in a first animation and a first part of a second animation of the object (see [0061-0070], [0081-0089], and [0153-0157]); and determining a second part of the new animation on the basis of a second part of the second animation (see [0112-0117], and [0164-0169]).

As per claim 2, Inoue et al. disclose the electronic device is a robot and the object comprises one or more servos of the robot (see [0056-0060]).

Art Unit: 3664

As per claim 3, Inoue et al. disclose the duration of the first part of the new animation does not depend on the start time of the second animation (see [0081-0089], and [0112-0117]).

As per claim 4, Inoue et al. disclose the processing unit executes the first part of the new animation as soon as certain user input is received, the certain user input triggering the second animation (see [0012-0018], [0090-0095], [0112-0117], and [0129-0137]).

As per claim 5, Inoue et al. disclose a contribution of the first part of the second animation to the first part of the new animation increases exponentially during a transition period (see [0098-0103]).

As per claim 6, Inoue et al. disclose a computer program product enabling upon its execution a programmable device to function as the electronic device of claim 1 (see [0081-0089]).

Claims 7, and 9, are method claim corresponding to device claims 1, and 8 above. Therefore, they are rejected for the same rationales set forth as above.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

. Maa (6572431)

. Tong (5636994)
